

Visit this website:

**[HTTP://WWW.WEBBUSINESS.SYNTHASITE.COM](http://www.WebBusiness.Synthesize.com)**

to learn about this phenomenal advertising system- see the list of people whose PseudoTube websites have already been created.

Order your own PseudoTube site RIGHT NOW from this website by clicking the maroon-colored writing at the top of the website which leads you to directly to the order page!!! View information about PseudoTube websites while you are on the order page, such as the Setup Process, Calculation of your future Return on Investment, Examples of already-setup PseudoTube sites and how the owners are completely satisfied with their PseudoTube: a quote from one of our customers is-

'Why spend your time writing a website when you can use the PseudoTUBE system . . . focus on marketing and promotion, that's what makes money'

(stated by David Chilver, of <http://www.CarHeaven.tv>)

and there is another customer, Lorin Wiener, of the site:

<http://www.IPhoneNuggets.com>

who only took less than 3 hours from the time of ordering his PseudoTube site to completely setup his own Pseudotube site - he tells the detailed story of how he accomplished this, and how everyone can do the same or even better!!! Here there are also articles on why you need 1000 visits a day and how to get your first sustained 200 visitors- PseudoTube sites have been known to get 200 visitors a day within the first few weeks! This is a phenomenal achievement in the history of internet marketing and should be a model for others to follow.

Of course there are other people trying to get you to buy a website from them that contains videos but the important difference with

the PseudoTube(TM) is that it is EFFORTLESS- meaning that you do not have to search for the videos yourself- imagine trying to download many many QUALITY videos from YouTube per day to a normal website!!!- You simply cannot manually search through that many in so little a time without getting tired and totally frustrated and losing hope, but with the PseudoTube system it will continuously automatically search and download them for you, as well as renew your video content regularly!- Simply visit some of the PseudoTube sites already in operation and see how many QUALITY videos they have in so little a time after setting them up- and while you are there, just notice how well suited to the website content they all are. What do you think those PseudoTube site owners are doing with their time right now? They can afford to spend their time creating just the right adverts to make them money and they can spend more time with family and friends- yes, they are working smarter, not harder!!- they are working more efficiently than you, who is trying to read this article in the hope of finding the miracle cure to your advertising nightmare, but you can stop your worry now because luckily you are in the right place at the right time and you do not need to search any further because folks, you have found your solution that you never dreamed you would find, right here, right now!!!

If you have spent time reading this article then that is quality time well-spent and you are to be congratulated for your wisdom. It could save you hours of time trying to manually advertise your website over the internet and also save truckloads of your money because you can do all your advertising of all your businesses from ONE PseudoTube site. Remember it is an already-working-website that has been designed by a top professional and so it already has everything that you need to start your own business- whether you are starting from scratch (in which case you might opt for the FREE version of PseudoTube) or if you are a larger firm (in which case you might opt for the business package of \$99 per year) or if you are already enormous then you would want to opt for the enterprise package (\$499 per year) so that you become even more enormous!!

If you get your own PseudoTube site then you will automatically be also entitled to affiliate commissions (an additional, unexpected

source of income) from anyone who joins from your site- and these are really generous- check it out when you are ordering your **PseudoTube** from the **maroon-colored** writing which leads you to the ordering page and further information.

The website:

<http://www.WebBusiness.Synthasite.com>

has been specifically designed as a normal website instead of a **PseudoTube** website because the owner would like to introduce you in a gentle manner to the idea of using video technology to advertise your business opportunity. If you look at the top of this website you will see a rather large fire-engine- red-colored rectangle filled with all different types of YouTube videos- this is so that you will have a look at the different multitude of themes of videos that you get from YouTube, which is Google's proudly owned multimillion-mega-buck little pup. You will need to create your own theme for your **PseudoTube** site so that appropriate content can be auto-downloaded to it and having a look at this red rectangle for some time will show you all the different themes. Of course sites such as Metacafe and Revver will also be searched and auto-downloaded to your **PseudoTube** site. The skyscraper banner at the top of this website entitled "Rent a Website" gives you a gentle feel for what a **PseudoTube** site looks like at the top of the banner and then lists important features and then tells you that it is \$99 per year (only for the business package)- we all know that you can get it absolutely delightfully gorgeously generously **FREE**- yum! A big hearty thanks to the founder for offering it **FREE!!**

There is then an article written by an online expert internet marketer giving strong reasons on why online video is the way to go in future internet marketing, he states: "in every niche"- by the way, if you are not familiar with internet marketing already, I will let you know that it is one of the toughest and most competitive games around. On a serious note, if you master the arts then you can really and truly earn millions but if you don't then I would advise you to go back to your day job because otherwise you will be simply the poor innocent victim making money for those millionaires

whilst you are going to the debt-collector! The bottom line is that you really need to know your stuff and know it real well to survive there. Fortunately The PseudoTube Advertising System offers any average person (even if a "newbie" to the internet) the chance to start to make it big without spending anything on the PseudoTube at all- can you just imagine the potential to the masses of what a strangely generous offer this is??? That is why the prediction is that the PseudoTube will stay around whilst it's competitors will fade away.

=====

### Summary:

PSEUDOTUBE Advertising System is a fully functional site that is built just for you and you don't need to know how to write web sites. You add content, place adverts and promote the site. This means your role is sales and marketing, not web development. The idea of running an already working web site is very new and a low risk way of starting an online business. The fastest growing type of site online today is viral videos, Youtube.com was bought by Google for \$1.65 BILLION dollars. The way to compete against a huge player like Youtube.com is to work a niche market.... you should aim for an income of \$50,000 to \$100,000 per year from a part time site.

=====

Continuing our journey through the website of:

<http://www.WebBusiness.Synthasite.com>

we find an ad from David Chilver who is the owner of PseudoTube site:

<http://www.CarHeaven.tv>

who states the obvious reason for getting PseudoTube as opposed to other normal websites for your business advertising- it gives us the

freedom to earn truckloads of money from our online business as well as do the other things we like to do - even people who don't know HTML language (Hyper Text Markup Language) can advertise like a pro on the web using the already-working **PseudoTube** formatted website. Nowadays who has the time to learn professional grade HTML?? Life is so short and full of all the things that we really NEED to do and learn. People who can write HTML are at times derisively referred to as "geeks."

Underneath David Chilver's famous ad is the featured video from his **PseudoTube** site which has been put here so that you will know the magnificent live sensational difference that it makes to the appearance of a normal website- you will always know you are on a **PseudoTube** site because although the featured video will have something like "YouTube" or "Metacafe" on it (this particular one has "PseudoTube") there will be a sign at the top stating "Powered by **PseudoTube**." You can email this video to several friends in one go from the bottom of the video. If you own your own **PseudoTube** site then your site's visitors will be able to add the player (with your URL embedded into it) onto their website, thus sharing your website with theirs- it is **viral advertising**- can you see the enormous potential of this??!!

Next there are some site-friendly tools- notably a toolbar that you can download that has an RSS feed which is constantly keeping you up to date with relevant facts from the internet as well as about **PseudoTube** and you can listen to the toolbar radio whilst surfing your internet websites (it even has the option of classical music so as not to distract you for when you are studying on the internet). There are favorite links on the toolbar to help you enjoy this website and you can join other toolbar users (form an exciting and rewarding social community) for a business chat when you feel like it from the link provided on the toolbar and provided on the website, too- share your ideas around, because what goes around, comes around too, and thus gets cycled!! Updated messages or alerts will be sent to you onto your toolbar or at times onto your desktop (at your Toolbar owner's discretion) so you won't miss them. There are great search tools for doing your web searches and other pleasant items that you need to see for yourself to enjoy them. You

will be part of a large and popular toolbar community!

There are also a few sponsored ads which change their content regularly, so look out for these.

Also there is a dynamic image of two links of a blue colored chain which allows you to post your favorite links so that visitors to the site can see your links- basically it is **free advertising** for you!- what a bonus! You can stop and see what links others have posted also when you have time to relax with a coffee. Most advertisers these days know how to post good links so often they are very useful (you would be surprised what you might find that you can use in your business).

Next there are banners full of free advertising and cheap flight offers. The theme of this page fits in with the **free advertising** offers.

As you scroll down you will find a list of links which commence with the **PseudoTube** sites that have already been created and are working well- the list is periodically updated. You need to visit these sites (you can do so with one click on them) to get a good feel for the actual thing in all sorts of themes before you get one of these sites for yourself- but do not be misled because each of the **PseudoTube** site owners have a differing theme to their site so yours might end up looking quite the opposite extreme of some of those already-created **PseudoTube** sites!

The rest of the index (home) page of the website

<http://www.WebBusiness.Synthesite.com>

contains a variety and multitude of **free advertising** offers as well as popular content (online DVD store, free music download, money loans; even popular cake recipes) which fits the overall theme of this website. Browse through the links (it takes 5 minutes of your daily routine) and get comfortable with this website. The reason for this being that unless you are comfortable you will not fully enjoy your product when you do finally order your own **PseudoTube**

Video-Website.

Finally there is a tool which you can use to rate the website:

<http://www.WebBusiness.Synthasite.com>

It is well worth spending just a few seconds to put in a number from one to ten because it helps the future site visitors (your colleagues) to know what their predecessors thought of it.

The next page of this website has ample links for you to contact the webmaster (photo is included) of the site even just to ask what you might think is a "silly" question like "I don't understand why the **PseudoTube** will be better for me than a normal website, please explain" or just simply say "more info please." It is very important to ask these simple-sounding questions because that is the best method of learning.

As well as "contact us" links, there is a guestbook which needs to be filled up with comments and ideas from everyone- do join in- it all helps in one way or another! There is also a form to fill in to join a mailing list so you can keep up to date with the latest- this is useful because you don't want to harbor outdated information. There is also a link to join a Skype Chat forum on **PseudoTube**- you can come when you like and express any ideas or just thoughts- no need to wait for the moderator. Skype is free for all- all over the world!!! It is excellent as a communicating tool- just choose a username and start chatting- so simple. It is a great way to meet others with similar minds- you never know who you can meet because your local neighborhood may not have all the cross-section of people with whom you can interact very well so for social reasons you need to meet a bigger cross-section of people and the internet can be the best (or the only )medium to bring people together.

The final step is the most important step- and that is social bookmarking. There is ample opportunity to find the tool that you like best at the top of this website - whether you are a MySpace fan or a Digg or Delicious fan.. there are many different ways to

bookmark here so undoubtedly you will find your favorite one in the list. Maybe you are not familiar with social bookmarking? Well then for you the last icon is informative (the icon with the blue-colored question mark, shaded in grey color)- this is a Wikipedia definition of the modern-day concept of social bookmarking and it's worth to society in general (a very helpful one, too). Social bookmarking is what makes the internet useful to society in general, because that bookmarked content has already been screened and approved by someone before you so you know it is worth spending time on.

+++++

A final word of friendly advice, I hope that you will follow and use this helpful website

<http://www.WebBusiness.Synthasite.com>

a lot and end up ordering your own **PseudoTube** site from it as a result of that because in all honesty, this is simply the BEST and NO. 1 offer in advertising that you will see around...because the simple things in life are the best ones.

In articles you will see reference to the **PseudoTube** Advertising System being the "Advertising Vehicle of the Modern Era" - this is obviously because the advertising system is an already-working website that has all features already in place for you to simply come along and plug your adverts into it and make your own theme of **PseudoTube**- thus it is indeed a "vehicle" because it carries your advertising on it and it is the advertising vehicle of the "modern era" because it has a multi-million dollar revenue-generating potential to it's user due to the ingenious design, made by none other than a genius who has been writing websites for professional use ever since the internet was available to us all -David Minns!

This has the potential to surpass Google's YouTube; Google might make a bid for this one as well- let's see what the pundits say!!! But in the meantime, let's just focus on the here and now, and join the increasingly growing line in the **PseudoTube** club and enjoy using

our PseudoTubes!!!

Do get your PseudoTube only from:

<http://www.WebBusiness.Synthasite.com>

because then you will get loads of personal support from me, the webmaster and I will be really happy that you benefited from my effort. I am your sales consultant or affiliate rep for PseudoTube so I would really like you to get it from my website.

Thanks very much for your valuable time and warm regards

Ange

(P.S. Do look out for other articles on PseudoTube)
